

**PROTECTING CHILDREN AFFECTED  
BY CONFLICT AND  
DISPLACEMENT: SYRIA RESPONSE**

# LARGEST DISPLACEMENT CRISIS OF OUR ERA

Highest number of refugees globally since WW2

Syrians are largest refugee population under UNHCR Mandate (second only to Palestinians globally)

# STAGGERING NUMBERS OF CHILDREN DISPLACED FROM SYRIA AND BEYOND

**5.6 Million**

Children living in dire situation inside Syria: Poverty, displacement and caught in the lines of fire.

**2 Million**

Children of Syria now live as refugees in Lebanon, Jordan, Iraq, Turkey, Egypt and other countries in North Africa.

**3.6 Million**

Children from vulnerable communities hosting refugees, who themselves are suffering due to the strain on services.

**2.8 Million**

Iraqi children forced from their homes, and left many trapped in areas controlled by armed groups.

 **Every half an hour**

35 children become refugees in the Middle East and North Africa region.

# TREND: INCREASING COMPLEXITY

- ❖ Conflicts: Children and civilians targeted
- ❖ Protection of children in non-camp settings, highly dispersed
- ❖ Refugees often in locations with high levels of poverty and lack of social services (rural areas, urban poverty)
- ❖ Scale of crisis has substantial impact on hosting countries
- ❖ 'New' Challenges: child recruitment (new forms); Children of concern within mixed migration

# DEFINITION OF CHILD PROTECTION

CP MS:

“Prevention of and response to abuse, neglect, exploitation and violence”

In refugee settings this is expanded slightly to include:

protecting and advocating against all forms of discrimination;

preventing and responding to abuse, neglect, violence and exploitation;

ensuring access to appropriate services;

and ensuring durable solutions in the child’s best interests”.

# KEY CHILD PROTECTION ISSUES

# TYPES OF CHILD PROTECTION ISSUES FACING REFUGEES

Source: UNHCR ProGres, 31 March, 2015, 3RP countries and Syria

# RESULTS FROM CHILD PROTECTION SURVEY MONKEY

## Q1 What country do you currently work in

Answered: 122 Skipped: 1

## Q2 What organisation do you work for?

Answered: 119 Skipped: 4

# LACK OF DOCUMENTATION

## Key Barriers to Birth Registration:

- Lack of awareness of procedures in country of asylum
- Lack of required documents
- Absence of fathers
- Lack of birth registration in Syria

## Impact of not registering Birth:

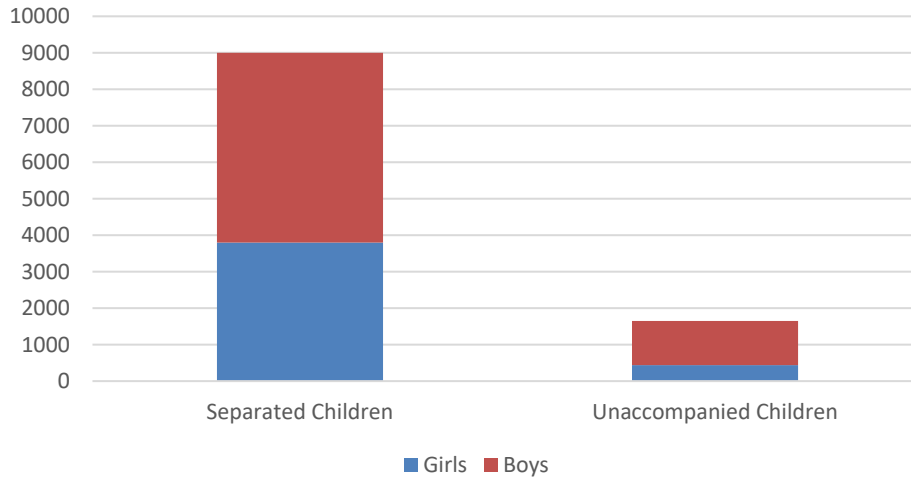

- Difficulties to access services
- Difficulties to prove age (education, legal protections for children)
- Risk of statelessness

**142,000 Syrian  
refugee children  
born in exile**

# UNACCOMPANIED AND SEPARATED CHILDREN

Number of UASC End 2014

Unaccompanied children especially vulnerable

Main causes of separation:

Death or absence of parents

Avoid recruitment (mostly boys)

Employment (mostly boys)

Sexual violence (mostly girls)

## الأطفال المنفصلون وغير المصحوبين

رسائل إلى الآباء والأمهات

- تأكد دائما أن أطفالك يعرفون أسمائهم وأسماء والديهم (إضافة إلى اسم الشيخ أو المختار إن أمكن) كما أيضاً يعرفون أماكن سكنهم وأرقام هواتفهم وإلى أين ذهبوا.
- أثناء السفر، تأكدوا أن جميع الأطفال معكم وعدم تركهم لأي سبب كان، وعلى الأطفال الأكبر سنّاً أن يبقوا أيديهم في أيدي الأطفال الأصغر سنّاً خصوصاً في المناطق المزدهمة.
- اتفق مسبقاً مع أطفالك ماذا يجب أن يفعلون في حال انفصلوا عنك.

unicef

# EARLY MARRIAGE

In Jordan, the proportion of registered marriages involving Syrian children rose from 18 to 25 per cent between 2012 and 2013.

48 per cent involved marriages between Syrian girls and husbands who were 10 or more years older than them.

Early marriages more common and more risky as a result of displacement because of:

Increased concerns for girls safety

Increased poverty

Way to secure better life for girl and her family in uncertain/difficult times

# PHYSICAL AND SEXUAL VIOLENCE AGAINST CHILDREN

## 5. أشكال العنف

### هناك أربعة أشكال للعنف:

#### العنف الجسدي:

والسبب الأكثر شيوعاً لاستخدام الكبار العنف ضد الأطفال هو لمعاقبتهم أو لتأديبهم على ما يعتبرونه سلوكاً خاطئاً أو لتعذيبهم ما هو صحيح، ولكن يمكن للكبار أن يستخدموا العنف الجسدي ضد اليافعين عندما يعزيمهم الغضب أو من أجل إظهار أو إيذاء الطفل عبداً ومن غير أي "سبب" واضح. وقد يلجأ اليافعون إلى العنف الجسدي ضد أطفال آخرين إن كانوا لا يعرفون سبباً أفضل لحل مشكلاتهم. أو عندما يفقدون اهتمامهم، أو لكي يتسببوا بالألم والأذى بشكل متعمد ليواجه آخر لا يحسنه. وأياً كانت تفسر أسباب ارتكاب العنف، فلا يوجد مبرر لاستخدام العنف الجسدي ضد شخص آخر.

يشمل العنف الجسدي ضرب الطفل باليد أو بواسطة شيء ما (كالصنارة أو الخيزران أو السوط أو الخناجر، إلخ)، ركل الطفل، هزّه أو رميه، قرصه، أو شد شعره، وإجبار الطفل على اللبوس في وضعية غير مريحة أو معينة أو كرامته، أو إجباره على القيام بجهد جسدي مفرط، أو حرقه أو تطويبه بالنار. وقد يحدث العنف في المدارس أو المنازل أو الجحش، ويترافق من حيث درجة الخطورة ما بين الخفيف والخطير. وقد ينتج العنف الجسدي عن أساليب تربوية قاسية أو عن عقاب جسدي صارخ لأن بعض الكبار يعتقدون أن التأديب والضرب مثلزامات. وغالباً ما يقرت العنف بأشكال أخرى من العنف الجسدي. يندرج تحت العنف الجسدي كافة أنواع العقاب الجسدي أو البدني وغيرها من أشكال التعذيب كذلك التي تُراد منها انتزاع إعراف ما أو معاقبة الأحداث بشكل خارج عن نطاق القضاء، على أفعال غير قانونية مشتمة، أو إجبار الصغار على المشاركة في أنشطة رغبا عنهم.

#### ما هي آثار العنف الجسدي؟

إن العنف الجسدي هو أكثر أشكال العنف وسوء المعاملة شيوعاً. وتظهر الآثار الجسدية عندما يكون العنف شديداً بما فيه الكفاية لتسبب إصابات كالكسور والجروح والرضوض وغيرها، ولكن تذكرنا أن الآثار قد لا تكون ظاهرة للعامة. يمكن أن يُركب العنف الجسدي من قبل الأهل أو المعلمين أو من قبل أطفال آخرين.

# CHILDREN ASSOCIATED WITH ARMED GROUPS AND FORCES

Various opposition groups recruiting children in Syria and Iraq

Children used in various roles, including fighting as well as support functions

Mostly boys but also girls

*Providing meaningful alternatives to adolescents and holding perpetrators accountable is crucial*

# PSYCHOSOCIAL DISTRESS AND MENTAL DISORDERS

# LACK OF EDUCATION

”

WE LOST EVERYTHING.  
THE ONLY THING WE  
DON'T WANT TO LOSE IS  
EDUCATION.  
MOTHER OF 8, ZAATARI

”

## One out of two

Syrian refugee children do not attend school.

In the region, many governments have provided access to refugees to national education systems. However, key challenges remain for refugees to access education including:

- Poverty
- Difficulties of national systems to respond to numbers and specific needs of refugee children
- Accreditation and language

# Common and urgent issues for adolescents

# Common and urgent under 12

# CHILD PROTECTION ISSUES

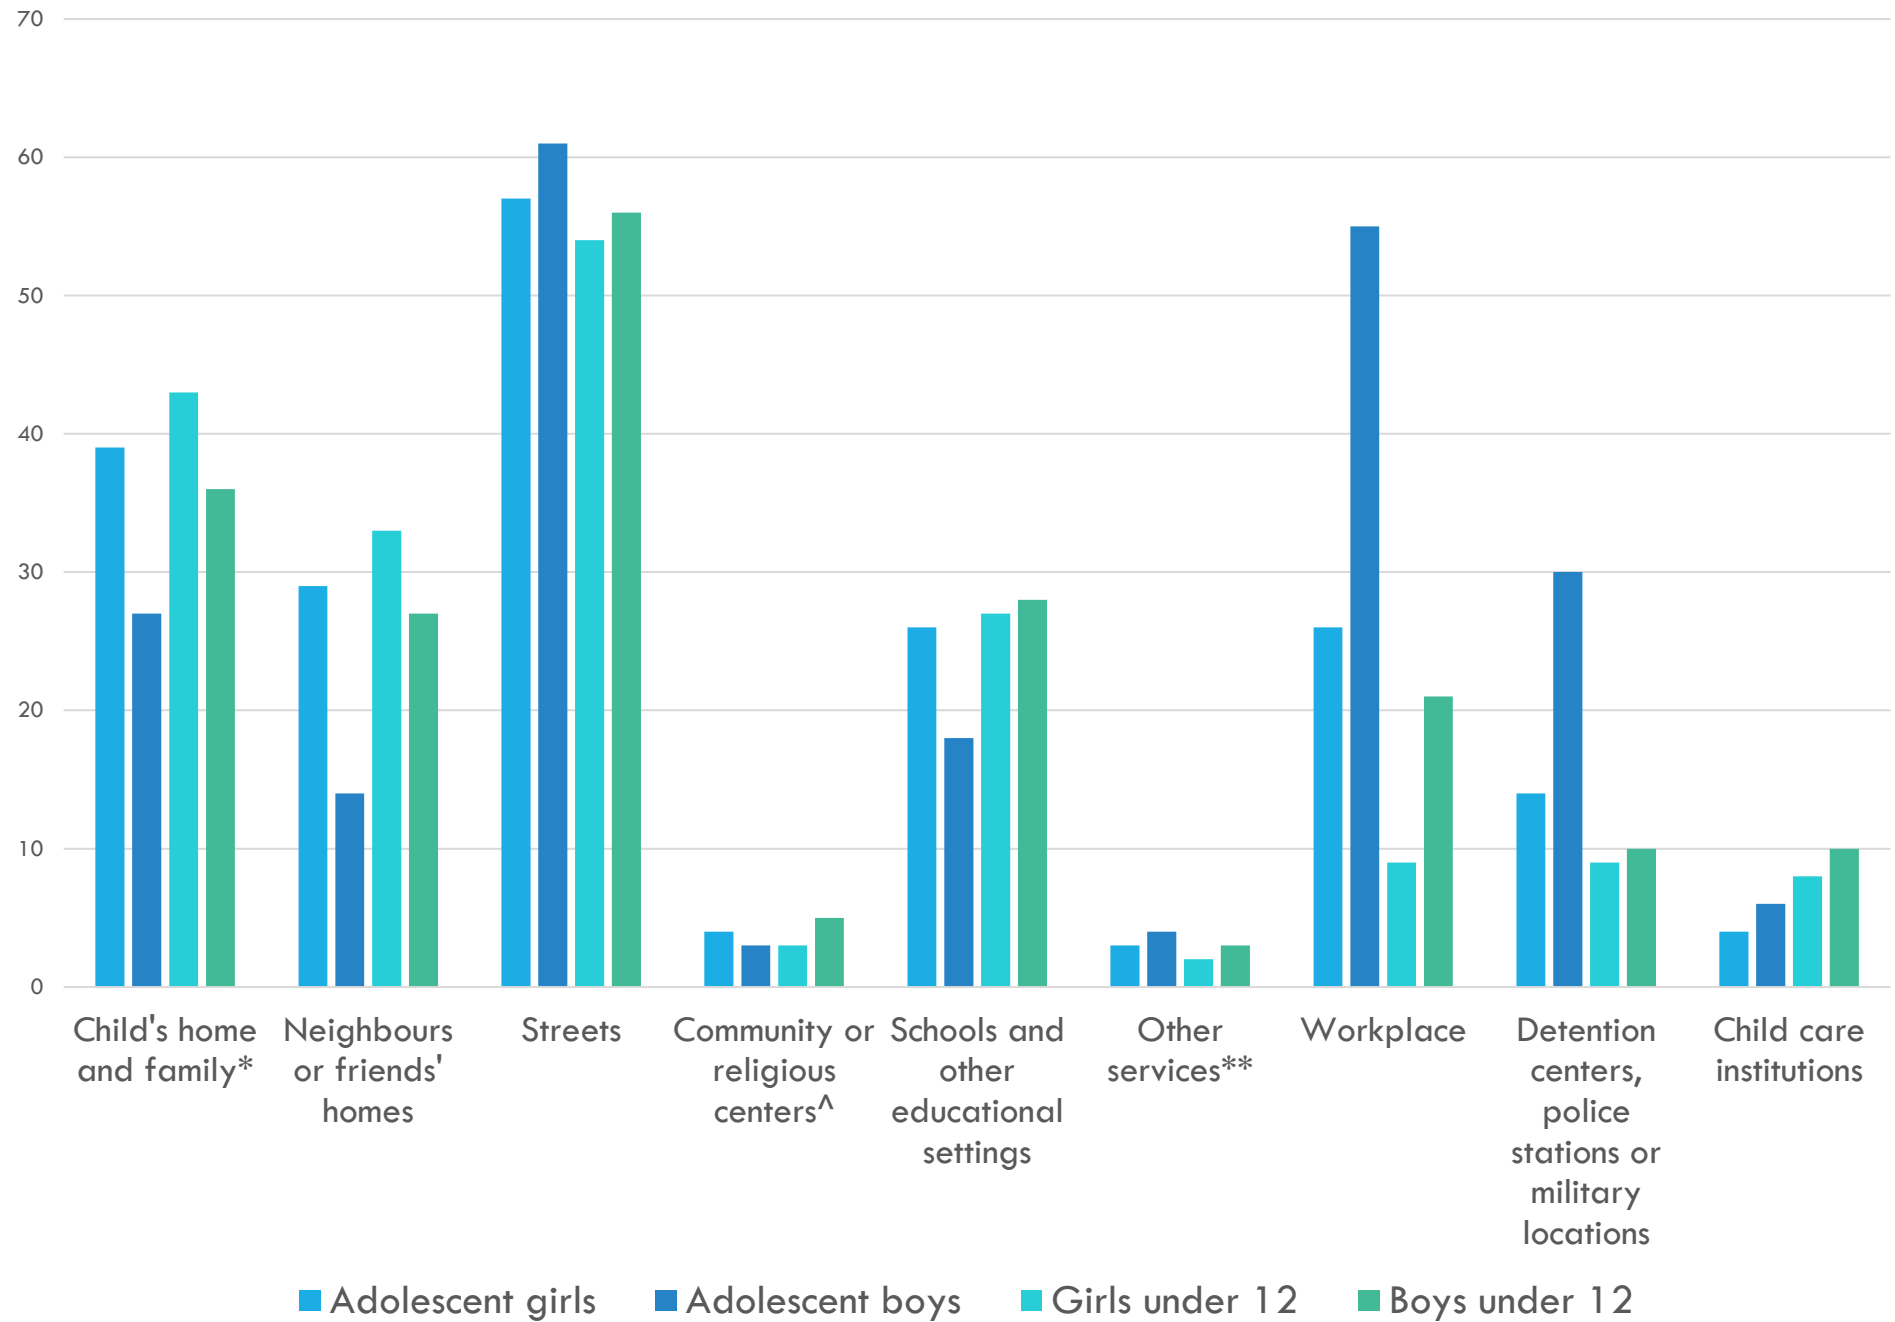

For all children (common and urgent) in order:

1. Physical and psychological violence
2. Psychosocial distress
3. Discrimination
4. Lack of documentation (more common than urgent)
5. Separated (more common than urgent)

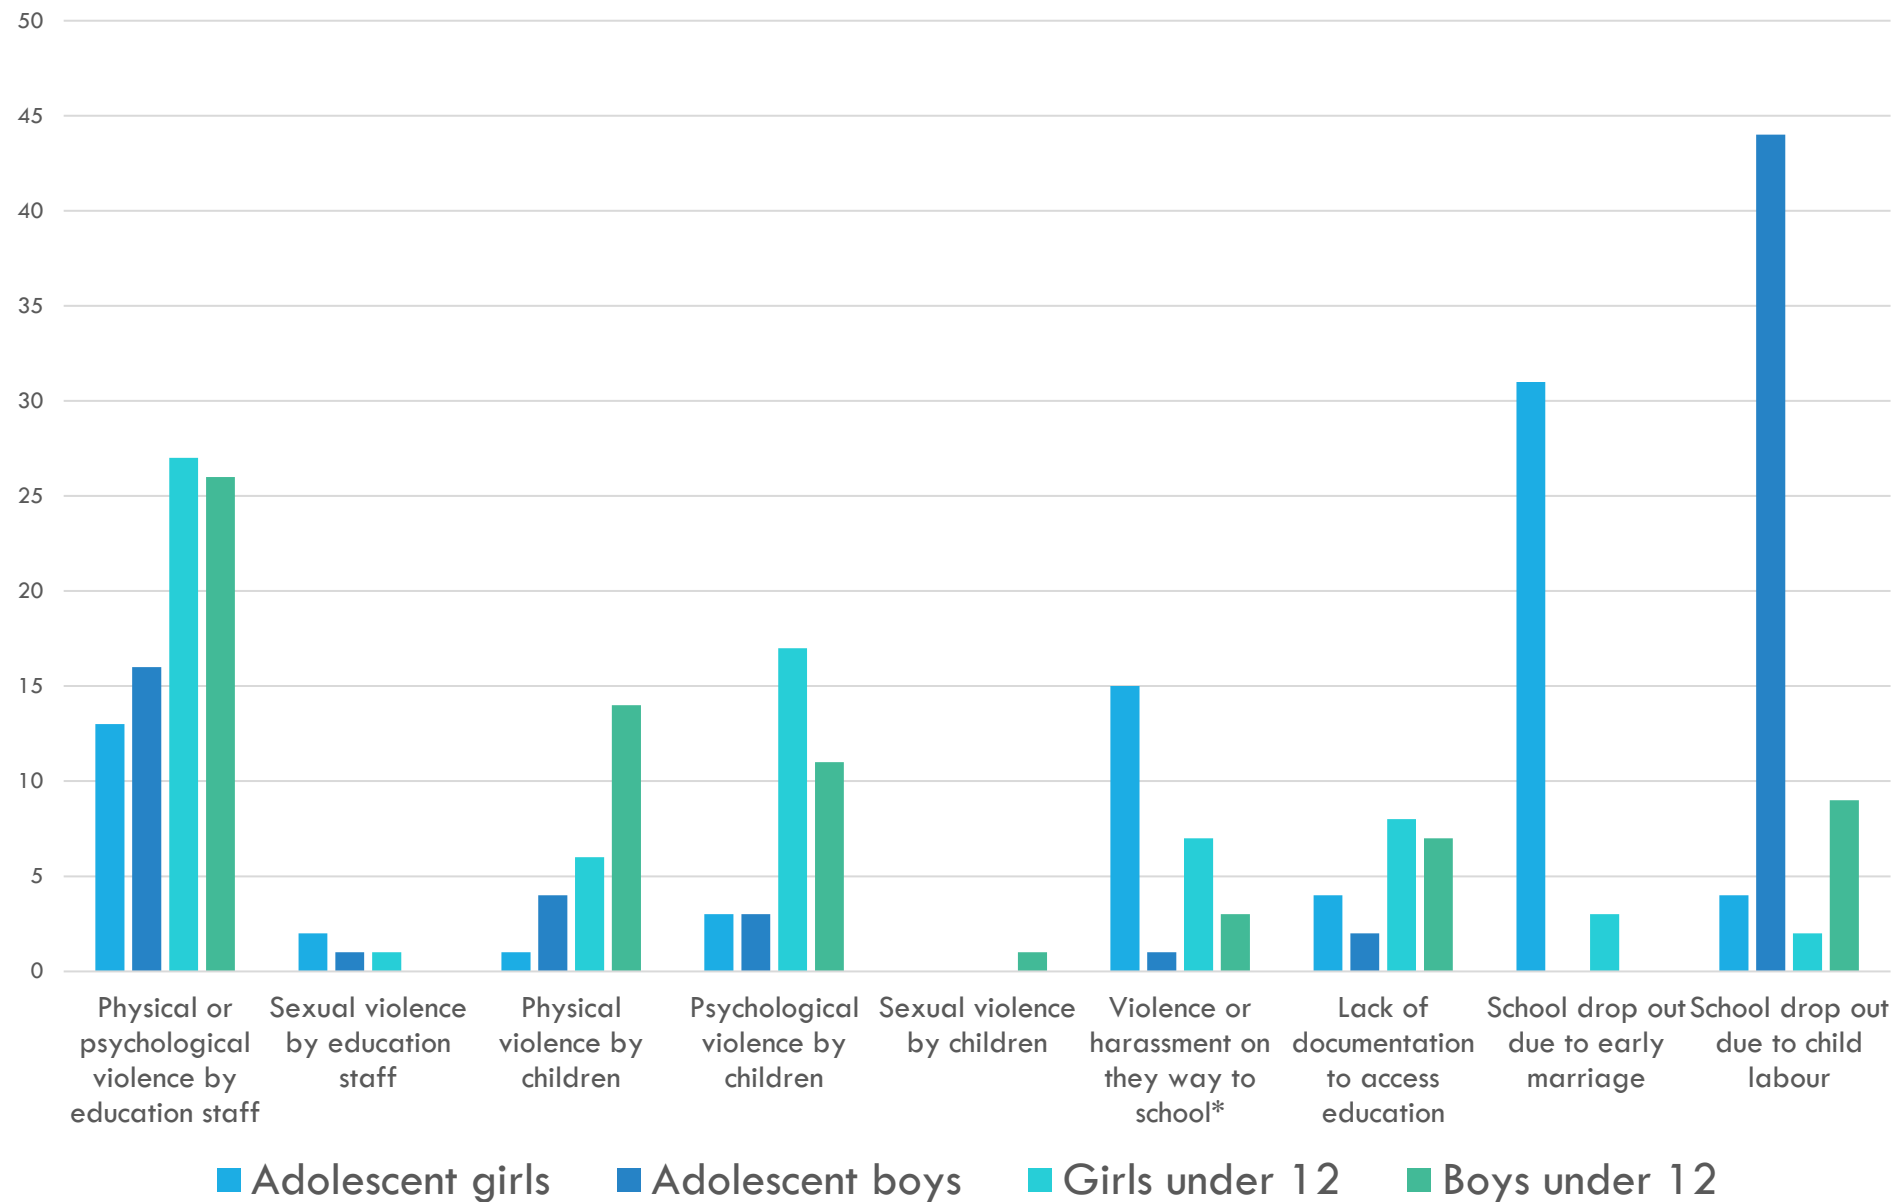

Age and gender specific:

1. Child marriage for adolescent girls (urgent and common)
2. Sexual violence for all girls (more urgent than common)
3. Child labour for all boys (urgent and common) esp. adolescents
4. Child recruitment (more urgent than common) and unaccompanied children (common and urgent) for adolescent boys

# Where are children most at risk?

# CP issues in educational settings

**RESPONSE** |

# KEY SHIFTS IN APPROACH TO PROTECTION OF CHILDREN IN REFUGEE SETTINGS

## ❖ **Broader scope of Child Protection**

Focus on ensuring protection for all children of concern rather than focusing more narrowly on specific pre-defined categories of children.

## ❖ **State Responsibility**

States are primarily responsible for the protection of all children, UNHCR's role is to support States in this.

## ❖ **Child Protection Systems**

Focus on strengthening CP systems rather than just addressing categories of children at risk.

## ❖ **Prevention and Response**

Balancing prevention and response – prevention is still the best cure

# SHIFTS IN RESPONSE TO SYRIA CRISIS

**Increased need to focus on strengthening national systems and sustainability**

*YET*

**Uneven scale and quality of national child protection systems**

*AND*

**Reduction of protection space in many countries:  
increased need to advocacy together with protection actors**

**Increased focus on supporting refugees and other affected populations to protect children (community-based child protection)**

# KEY RESULTS

Strengthening national child protection systems

Provision of specialized services

Community based child protection and PSS

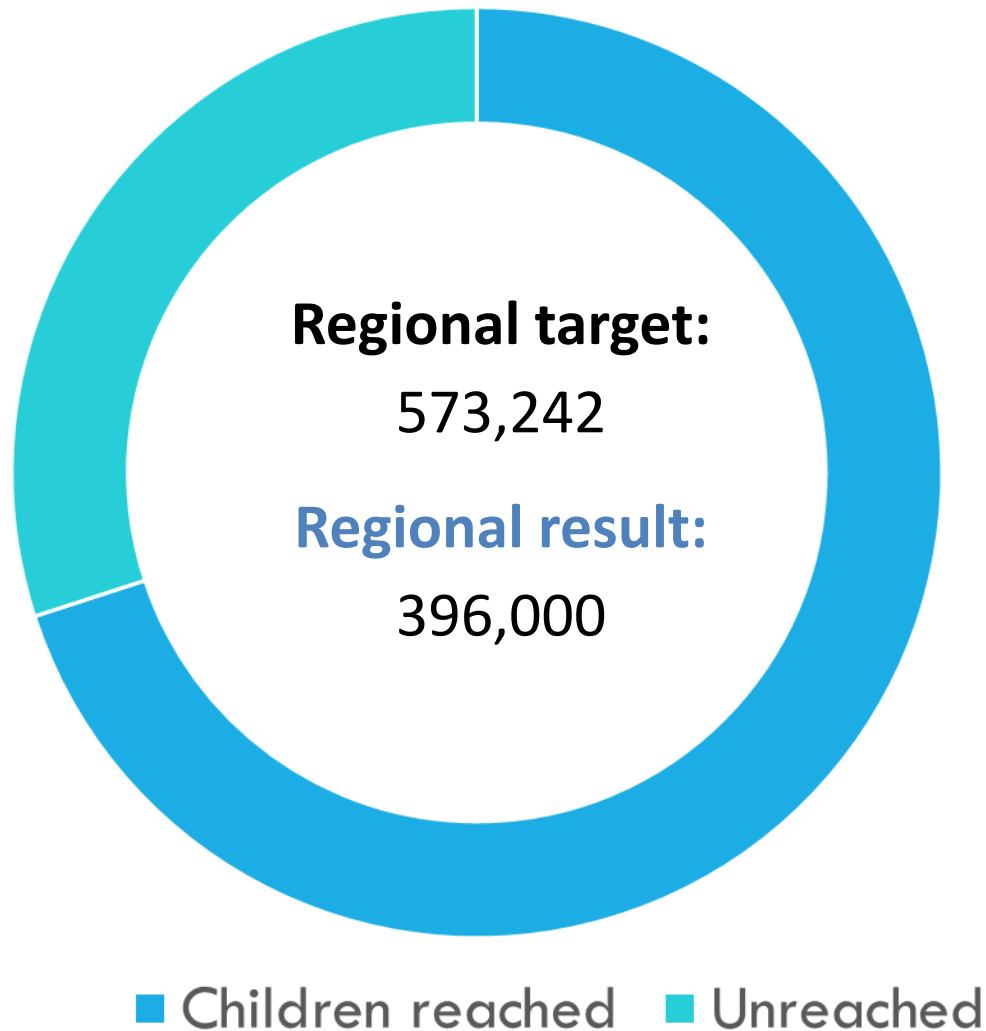

Advocacy and knowledge management

**Each programmatic area addressed using combination of the above strategies - For example: Prevention and response to UASC**

- ❖ Development of national guidelines and systems on alternative care
- ❖ Provision of case management, BIA/BID for UASC
- ❖ Awareness raising and communication campaign to prevent separation
- ❖ Data collection and analysis to understand trends and patterns to better respond

## RRP5 2013: Targets and Results

- 69% of target reached in 2013
- Some country data not disaggregated by age and/or type of activity
- Mixture of definition of PSS (reached with “*what*”?)

## RRP5: Results compared to total Child Refugee Population (Dec 2013)

- 15% of children reached with PSS out of the total child PIN.
- PSS overall focused on age group 5-12

## RRP6 2014 Targets and Results

- 105% of target reached in 2014
- 2014 target was 30% higher than 2013
- 2014 result was almost double 2013
- Anomalies with data from 1 country
- Sex and age disaggregated not systematically available across region

## RRP6: Results compared to total child refugee population (Dec 2014)

■ Children reached

- 20% of children reached with PSS out of the child people in need (PIN) planning figures for protection sector.
- 5% increase in sectors reach compared to 2013.

## RRP 6: Children receiving specialist child protection support

■ Children reached    ■ Children unreached

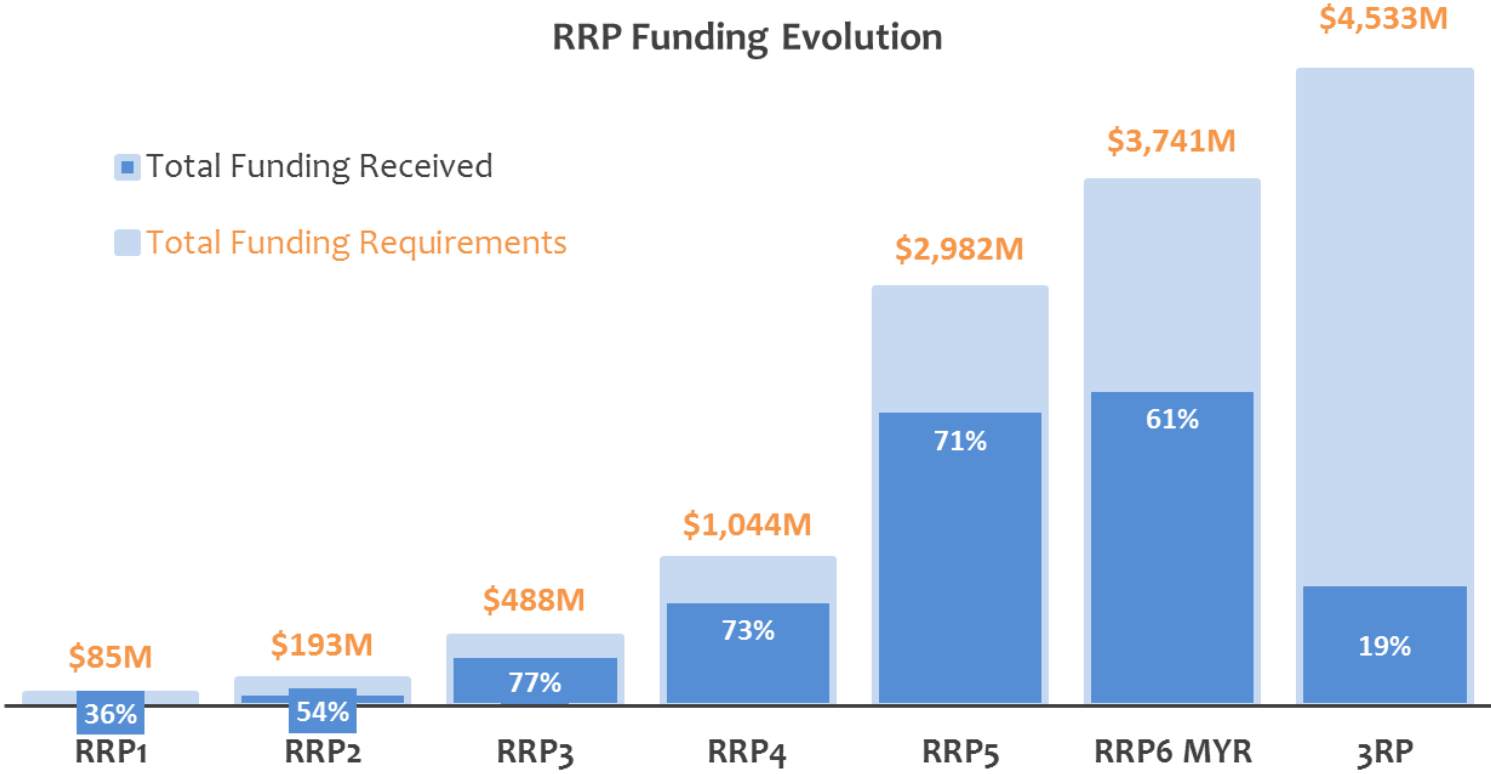

- 85% of target reached in 2014.
- Indicator systematically reported at regional level only since 2014

# FUNDING

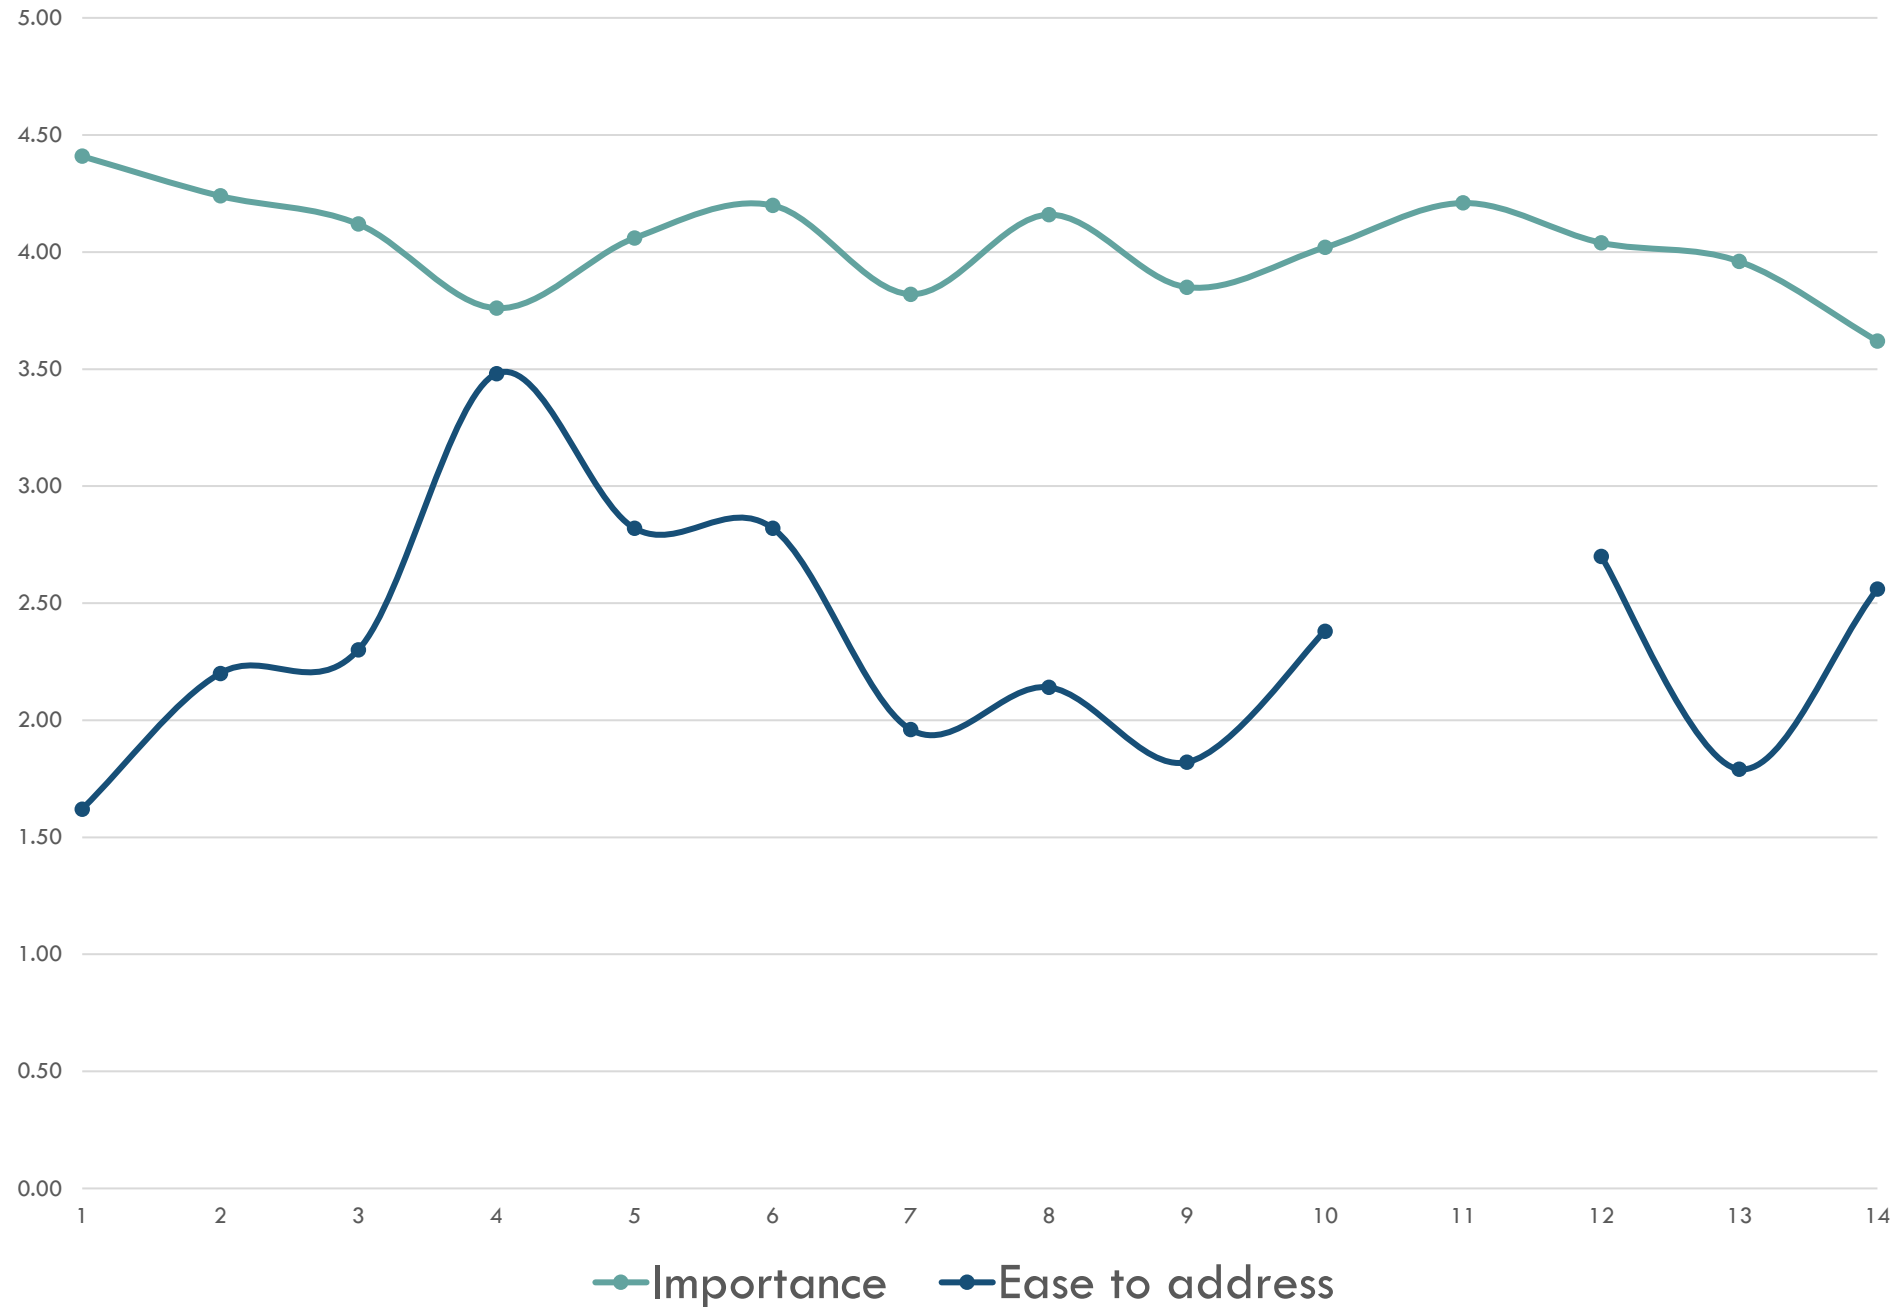

RRPs/3RP - All Agencies Funding - year comparison

# FUNDING OVER TIME

# Strategies: Importance and Ease

# HOW TO PRIORITISE STRATEGY?

## **Short term: Important and Easy**

Increasing the availability of services

Improving the quality of services

*Increased humanitarian access to affected populations*

## **Longer term: Important and Difficult (increasing difficulty)**

*Increasing funding and/or more predictable funding*

Addressing family attitudes and behaviours relating to child protection

Addressing community norms relating to child protection

Improving implementation of existing child protection laws or policies

*Improved security and reduction in armed conflict*

*Reducing poverty and improving livelihood opportunities*

**Easy but less important:** Improving families and communities knowledge of services

# Effectiveness of current strategies/approaches
